EARTH  
FRIENDLY

GIFTING

proudly made in India

[www.eha.eco](http://www.eha.eco)

# say hello to a happy world!

eha is earth – our home.  
the place we feel safe and secure.  
eha is also for our homes, our lives & the planet.

## gifts made by upcycling crop-waste

eha gifts are safe & sustainable with superior quality. they are made from biocomposites using responsibly sourced crop residue with circularity principles.

bamboo offcuts

coffee husk

rice husk

# gifting with complete accountability & transparency

## 01 crop-waste - the feedstock

we source rice husk, coffee husk, bamboo, etc from farm or factory that results in value to such crop-waste

## 02 biocomposites - the foundation

we blend crop-waste with suitable binders to make biocomposite materials with our proprietary IP & infrastructure

## 03 eha - earth-friendly products

our qualified partners mould best-in-class eha products from biocomposite materials that we make

## 04 gift set - your guilt-free choice

we bundle eha products together as per your needs & choice. our qualified partners do the printing if necessary

## 05 gift - with responsible packing

gift set is packed with minimalistic design, using circular materials sourced from our qualified partners

# products are made with nature inspired colors

coffee

tortilla

sand castle

coral

fern

charcoal

azure

celeste

innocent

colors can be customised for bulk orders.

## comfy cups

contact us for different color options, printing & packing needs

# circularity is the only sustainable way of living within our earth's limits

at eha, we are building a beautiful world where nothing is wasted, everything has value beyond single purpose and where husk is valued as much as the grain.

eha gifting products are made following the three guiding pillars of circularity, from product concept to its end of life.

---

## 01 eliminate waste & pollution

made with crop-waste, and other recovered materials, eha gifting products eliminate waste right at the beginning of the product lifecycle.

---

## 02 reuse products & materials

eha gifting products are built to last for many years with best-in-class design and quality. they can be recycled after extensive use.

---

## 03 regenerate natural systems

by making gifting products with materials that can be reused, repurposed and recycled many times, eha supports regeneration of nature.

the linear 'take - make - dispose' system, which depletes natural resources and generates waste, is deeply flawed and can be productively replaced by a restorative model in which waste does not exist as such but is only food for the next cycle

Ellen MacArthur

# our 4e promise

## **elevate**

by contributing to a better planet & future

## **engage**

to uplift farmer and rural communities

## **experience**

superior quality products meet global standards

## **ensure**

QR code provides product origin & its footprint

we learn from nature, & collaborate with it. nature is circular; natural growth comes from regeneration, not exploitation. eha is one of the opportunities to build circular economy, which reuses, replenishes & renews even as it grows. looking beyond circularity, eha is committed to green economy that promises social inclusion & wellbeing for all - so, when you gift someone with eha products, you are not just sharing happiness with your loved ones, but also a bunch of people across the value chain of making eha products.

Mahadev Chikkanna

# our impact

our primary purpose include 2 of the 17 UN sustainable development goals.

- reduce carbon footprint through biocomposite materials & products
- reduce carbon footprint by preventing crop-burning
- lock biogenic carbon from crop-waste in durable products

- prevent resource depletion by replacing plastics with crop-waste
- support recycling and regeneration of resources with circular design
- zero waste manufacturing

we are also committed to 12 of the remaining 15 UN SDGs.

by measuring our impact, we understand the opportunities to continuously drive meaningful change.

**800 tons**

CO2 reduced

identical to avoiding emissions from 550 cars in a year

**250 tons**

crop-waste used

comparable to preventing 100 acres of crop-burning

**300 tons**

fossil plastic reduced

that's how much 20K adults consume plastic in a year

happiness for our homes, communities & our planet

[www.eha.eco](http://www.eha.eco) | [care@eha.eco](mailto:care@eha.eco) | +91 89517 83337

made with biocomposites using

**bamboo**

**rice husk**

**coffee husk**

thanks for choosing an eha product.  
When you do, you contribute to ...

- reduce climate change
- support farmers welfare
- reduce plastic pollution
- encourage sustainability
- preserve the planet
